

# TETHYS ENOTEC

## Complete project solutions from one hand

### Water Treatment Plants (WTP) (stationary and mobile)

- Special Filters (sand -, activ carbon -, multimedia filter)
- Hydrophore stations
- Desalination of salt- and brackish water for “potable water” and “distribution” plants (water maker for temporary camps)
- Cooling water polishing - plants
- Process water, DM-water
- RO-plants (water maker, compact containers)
- Ion-exchanger (IEX), (compound float bed ion exchanger, upstream ion exchanger downstream ion exchanger, and mix-bed-ion exchanger)
- Engineering for sweet water housekeeping

### Sewage Treatment Plants (STP) (stationary and mobile)

- Sewage Treatment Plants for industry wastewater (sewage)
- Sewage Treatment Plants (STP compact systems/skids) for offshore platform
- Neutralization plants (compact containers for outdoor installation)
- Oily water separators (skids and large land concepts for example for 100 m<sup>3</sup>/h)
- Engineering for waste water systems (industrial and communal sewage)

### Hydrography (natural resources)

- Hydrography, economically handling of natural water resources (river weir control natural water buffering, level metering systems for weir control)
- Pneumatical level meters for rivers and lakes
